ABOUT ME

Information Technology undergraduate with hands-on experience in Python, backend development, and full-stack application development. Strong problem-solving skills with experience building and deploying end-to-end software applications.

WORK EXPERIENCE

AI & Brand Design Intern, *Peepri Apparels* 04/2026 – Present | Remote

- Utilized AI tools and prompt engineering to generate product designs and marketing assets.
- Managed Shopify store operations, including product listings and catalog updates.
- Created digital content for social media and email marketing campaigns.
- Collaborated with the team to streamline branding and content creation workflows.

Data Science Intern, *Null Class* 08/2025 – 09/2025 | Remote

- Developed **3** machine learning applications for age detection, car color classification, and speech emotion recognition using Python.
- Processed **5,000+** data samples and trained models using TensorFlow, Scikit-learn, and OpenCV.
- Built **3** end-to-end machine learning pipelines from data preprocessing to model evaluation.
- Presented project progress and performance metrics during weekly mentor reviews.

EDUCATION

Bachelor of Engineering (B.E.) – Information Technology 2023 – 2027 | palghar
St. John College of Engineering and Management | Palghar, Maharashtra | CGPA: 7.38/10

Higher Secondary Education (HSC), *P.G. Junior College, Bordi* 2021 – 2023 | Bordi

SKILLS

Programming Languages — Python ,JavaScript , Java , SQL
Backend & Web Development — FastAPI, Flask, REST APIs, React, Next.js
Databases — MySQL , ChromaDB
Developer Tools — Git, GitHub, Vercel, Render
Software Development — Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Version Control
Machine Learning — Scikit-learn, TensorFlow/Keras, LangChain, Prompt Engineering, Retrieval-Augmented Generation (RAG)
Data & Analytics — Excel, Power BI, Data Visualization, Data Cleaning & Preprocessing

PROJECTS

RAG-Based Personal Knowledge Assistant, *Tech Stack: Python, FastAPI, Next.js, LangChain, ChromaDB*

- Developed a full-stack document assistant that converts PDFs into a searchable knowledge base using RAG.
- Built REST APIs with FastAPI and implemented semantic search using LangChain and ChromaDB.
- Deployed the application with an interactive chat interface for context-aware document querying.

Mental Health Emotion Detection, *Tech Stack: Python, FastAPI, DistilBERT, Hugging Face, Render*

- Fine-tuned a DistilBERT model to classify mental health-related emotions from text.
- Developed a FastAPI REST API for real-time emotion prediction and integrated an interactive web interface.
- Deployed the application on Render and evaluated model performance using accuracy, precision, recall, and F1-score.

LifeScreen – Digital Behavior Intelligence System, *Tech Stack: Python, Scikit-learn, Streamlit, Plotly*

- Developed a machine learning application to predict mobile addiction risk using behavioral data.
- Built an interactive Streamlit dashboard with real-time predictions and data visualizations using Plotly.
- Implemented data preprocessing, model training, and evaluation as part of an end-to-end ML pipeline.

CERTIFICATIONS

- Data Analysis with Python
- Machine Learning with Python
- Machine Learning with Python Level 1
- AI-ML Google Virtual Internship

ACHIEVEMENTS

LeetCode

- Solved 250+ Data Structures and Algorithms problems on LeetCode.
- Completed a 50-day coding challenge, demonstrating consistency and disciplined problem-solving.
